

Caption Confusion

What a mess! If you read the first row of this table horizontally, it says, "The **mass** of San Francisco to Philadelphia is 12 feet." That makes no sense at all. With a partner, please cut out these 18 sentence parts, then rearrange them so they make sense. If you succeed, your new sentences will work as captions for the images on **Concept Cousins**. When you and your partner are confident that you have the correct sentence to be an image's caption, rewrite the sentence into the blank lines below the image.

MASS

Here is a sample of how to write a caption.

The mass of the gold bar is 1 kilogram.

The mass of	San Francisco to Philadelphia	is 12 feet.
The volume of	the measuring cup	is 70 kilograms.
The length of	the astronaut	is about 150 milligrams.
The weight of	the ladder	is 2 cups.
The distance from	the puzzle cube	is 2,875 miles.
The capacity of	the apple	is 27 cubic inches.
