

## Measuring Up Metric: Design Challenge

### Custom Glove Maker Switches to Metric Measurements

The All-Star Industrial Workglove Company needs help. They plan to recalibrate all of their systems for making gloves from the U.S. customary system to the metric system. They are asking for people to submit as much data as possible from measuring a human hand. Your task (with a partner) is to:

1. Think of every possible way to measure different aspects of a human hand.
2. Measure and record as much data as possible.
3. Organize and submit your data to All-Star in a format that is easy to understand, packed with information, and in only metric measurements.

Here are a few ideas  
to get you started:
